

The Suttie Group

Passionate about People, Partnerships & Performance

Manager Mine Planning – Mine Engineer - Mx

The Suttie Group is working with a well funded Silver producer in Mexico who has an opportunity for an accomplished Mine Planner to be responsible for leading all design aspects of the construction of new underground and/or surface mines or expansion of current mine sites, including geotechnical, mine layout, infrastructure, ventilation, development, production and material handling systems. This role will identify the characteristics of mine development sites to design the processes, labor and equipment required for safe, economical, and environmentally appropriate activities.

Requirements:

- 10+ years of experience in the design, construction and operation of modern underground mining projects
- Bachelor's degree in mining engineering or equivalent
- Experience leading and developing technical personnel teams
- Experience in project management and budget preparation
- Ability to effectively communicate, both verbally & written, engineering/technical related information
- Proven team player skill with ability to build and maintain internal relationships
- High level of communication and motivational skills to deliver results
- Fluent in both English and Spanish
- Must be willing to live in Guanajuato State in Mexico

If you are ready to take your career to the next level, please submit your resume in Word format to Elizabeth via the www.suttiegroup.com website.

Your confidentiality is assured and we look forward to representing you!
