## Project Manager – P. Eng.

The Suttie Group is pleased to be assisting a Vancouver based client with an exciting opportunity for a Professional Engineer with strong project management & mine development experience to advance their Project through feasibility. The Project Manager will provide support at the corporate level including project mine planning, technical input to environmental assessment, permitting and financial evaluations. This is an advanced stage VMS exploration project located the USA. The project hosts two NI 43-101 compliant resources and is being advanced as a 4 year plan to complete pre-feasibility/feasibility studies which includes developing an underground exploration ramp to support underground drilling. Preliminary Economic Assessment presents a low capex, low operating cost, high margin underground mining operation with attractive environmental attributes.

### As the successful candidate you will:

- Provide leadership and accountability on all surface and underground infrastructure planning, budgeting and execution related to completing the planned underground development and exploration work.
- Provide direct input and participation in mining studies (PFS/FS), evaluation, specification, design, and operation.
- Establish and manage project safety plan and ensuring Health, Safety and the Environment is emphasized throughout all phases of the project.
- Management of logistical challenges at a remote site including coordination with barge, air, and land freight utilization.
- Coordination with multiple contractor entities for the purposes of mining, construction, and exploration.
- Assist in the design and construction of exploration roads and avalanche mitigation structures.
- Ensure overall project scope of services and scope of work are performed in a safe, cost effective and timely manner.
- Contribute to operating and capital cost estimations.
- Assist with short and long range mine planning.
- Support enforcement and/or implementation of environmental, social, and corporate governance (ESG) requirements and initiatives;
- Assist with the development, tracking, and compliance reporting of all operating permits.

### Qualifications:

- 15+ years of related experience in mine development projects with a minimum of six to eight years of project management experience including at least two (2) field assignment(s) with supervisory responsibilities.
- Bachelor's degree in engineering or another technical field from an accredited university or equivalent experience.
- Registration as Professional Engineer (preferred - alternatives may be considered)
- Strong understanding of the mining sector with experience in various levels of mining studies (PEA/PFS/FS)
- Promotion of innovation and efficiency of facilities and project execution
- Demonstrated leadership qualities, delegation skills with strong organizational capabilities and focus;
- Fluent spoken and written English language skills - communication with various stakeholders including reports, peers, and management
- Team builder with priority on safety, environment, and community.
- Experience in mountainous terrain would be desirable.

If you are a seasoned Project Manager who enjoys a challenge, this may be the opportunity you have been waiting for. Please submit your resume in MS Word format in confidence to Elizabeth via the [www.suttiegroup.com](http://www.suttiegroup.com) website.

I look forward to working with you.
