

The Suttie Group

Passionate about people, partnerships and performance

Senior Manager, Technical Services

The Suttie Group is working with a well-funded Canadian gold producer in Latin America with an exciting opportunity for a Senior Manager, Technical Services is responsible for functionally overseeing all mine related technical services activities as well as provide operations support to the VP Operations as required. Provide technical support to the Tech Services Managers, Senior Engineers and Senior Geologists in the development of short-medium-long range underground and open pit mine planning, budgeting, cost control, surveying, contracts administration, mine production, project construction, geology, hydrology and ore control. Maintains a focus on team development and mentorship to adhere to safety and environmental legislation, regulations, Company policy and procedure, and good management practices.

Responsibilities:

- Foster a 'Safety First' environment where all employees feel included in the safety procedures, processes and reporting necessary for the company to have outstanding safety performance;
- Effectively create a culture of commitment, cooperation and communication that will result in a mine management philosophy committed to excellence and continual renewal;
- Utilize and promote best practices through continuous improvement and the use of software, tools and work methods.
- Oversee all technical plans and budgets including mine designs, technical plans, LOM plans and 43-101 reports working hand in hand with Mine Technical Services and General Managers onsite, as well as external consultants;
- Support Technical Services to ensure that mine designs and plans are complete and timely;
- Direct long range mine planning to support forecasting, budgeting, and life of mine plans;
- Trade off studies of mine optimizations, mine services and infrastructure projects;
- Support the administration of mining contracts focusing on cost control, data management and process improvement;
- Develop and manage the consolidated production budget.

Qualifications/Experience:

The ideal candidate will have extensive technical experience in both surface and underground mine operations with an understanding of geology, mining, productivity and costing, project management, and business budgeting & planning to be effective in the role. Critical requirements include:

- B. Sc. in Mine, Metallurgy or Mineral Engineering or other related discipline;
- 10-15 years of mine engineering experience, technical services or in corporate roles supporting the mining function combined with 3-5 years of managing mine operations
- 5 - 7 years in a leadership role
- Experience working with 43-101 reports (3 - 5 years)

Skilled with:

- UG and OP Mine Design;
- Developing mine site annual budgets and LoM plans;
- And able to review 43-101 reports (3-5 years)
- Contract management with implementation of cost controls;
- Greenfield/brownfield project construction and start-ups;
- MSOffice, Mine Planning 3D software (Minesite, Vulcan, Datamine, Mine 2-4D, Surpac, etc.)
- Planning Software Experience (Primavera, Minesched, MS Project, etc.);
- Fluent Spanish and English.

If the above describes you and you are ready for a new challenge, please submit your resume in MSWord format to Elizabeth via the www.suttiegroup.com website. Your confidentiality is assured and I look forward to working with you!
